HISTORY

Meets Specifications

Hi Udacian

Congratulation on completing your stage 1 ✨ 🌟
You had done really a great job 👏

Keep it up in your future projects 👍🏻

Excited to see your work in future projects :D

Keep learning and Stay Udacian

〰

Responsive Design

All content is responsive and displays on a range of display sizes.

Content should make use of available screen real estate and should display correctly at all screen sizes.

An image's associated title and text renders next to the image in all viewport sizes.

✅ all content is responsive and displays on a range of displays sizes.

Images in the site are sized appropriate to the viewport and do not crowd or overlap other elements in the browser, regardless of viewport size.

✅ Images in the site are sized appropriate to the viewport 👏🏻

On the main page, restaurants and images are displayed in all viewports. The detail page includes a map, hours and reviews in all viewports.

✅ page has all required details visible 👍🏻

Accessibility

All content-related images include appropriate alternate text that clearly describes the content of the image.

✅ The alt attribute provides alternative information for an image if a user for some reason cannot view it. Great work associating alt attribute with every image tag. 🌟

Focus is appropriately managed allowing users to noticeably tab through each of the important elements of the page. Modal or interstitial windows appropriately lock focus.
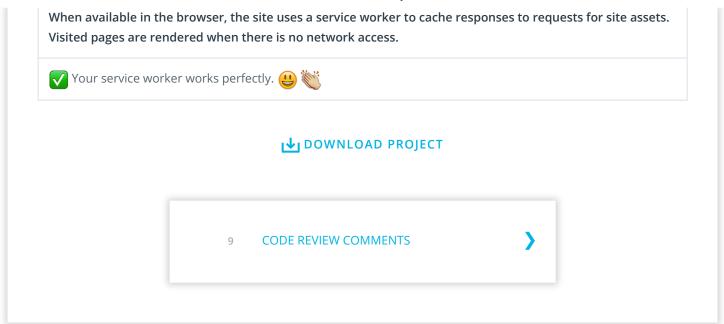

✅ Focus is appropriately managed. All the key elements are accessible by press tab key. 🎉

Elements on the page use the appropriate semantic elements. For those elements in which a semantic element is not available, appropriate `ARIA roles` are defined.

✅ Great work with adding the role and label to the tags 👏🏻

Offline Availability

When available in the browser, the site uses a service worker to cache responses to requests for site assets. Visited pages are rendered when there is no network access.

✅ Your service worker works perfectly. 😃 👏🏻
